## PRINCIPAL'S MESSAGE

As the Principal of the school, I feel honoured and privileged to be part of this school where everyone is a learner and every day is an opportunity to learn and discover more and more. We look at ourselves as a community of learners, where everyone learns including our teachers, parents and staff. Today the role of school is not to pursue academic excellence but also to motivate and empower its students to be life long learners, critical thinkers and productive members of society. Our school promises a very enchanting environment for

children to learn grow and spread their wings. When we talk of curriculum we mean planning involving implementation of different types of instructional strategies.

While academic excellence is our major thrust, the school is also devoted to prepare the students for life, groom them to face the future challenges, and encourage them to be socially relevant. We constantly endeavour to always live upto this ideology and inculcate this into everything we do, with the aim that we will be able to ensure that the children grow to their full potential, while constantly being groomed to pass out as men and women competent to bear responsibility in all walks of life.

Dear parents, we want to make our students successful in their life. Education is not just a process of giving knowledge for future job but a life-long process which creates an understanding of moral and ethical values to guide one's life and makes students the future hope of the country. For this, a positive communication and interaction is necessary among students, teachers and parents.

I hope we all create a healthy and secure environment for the students so that they overcome their challenges of this competitive world not only with education but also with moral and ethical values. Thanks.

Principal
